

CONTENTS

PART I PRELIMINARIES

| | |
|---|----------|
| 1 Preliminaries | 3 |
| 1.1 Interest rates and compounding | 3 |
| 1.2 Zero coupon bonds and discounting | 5 |
| 1.3 Annuities | 6 |
| 1.4 Daycount conventions | 7 |
| 1.5 An abridged guide to stocks, bonds and FX | 8 |
| 1.6 Exercises | 9 |

PART II FORWARDS, SWAPS AND OPTIONS

| | |
|---|-----------|
| 2 Forward contracts and forward prices | 13 |
| 2.1 Derivative contracts | 13 |
| 2.2 Forward contracts | 14 |
| 2.3 Forward on asset paying no income | 14 |
| 2.4 Forward on asset paying known income | 16 |
| 2.5 Review of assumptions | 17 |
| 2.6 Value of forward contract | 19 |
| 2.7 Forward on stock paying dividends and on currency | 20 |
| 2.8 Physical versus cash settlement | 20 |
| 2.9 Summary | 21 |
| 2.10 Exercises | 22 |
| 3 Forward rates and libor | 25 |
| 3.1 Forward zero coupon bond prices | 25 |
| 3.2 Forward interest rates | 26 |
| 3.3 Libor | 27 |
| 3.4 Forward rate agreements and forward libor | 27 |
| 3.5 Valuing floating and fixed cashflows | 29 |
| 3.6 Exercises | 30 |
| 4 Interest rate swaps | 33 |
| 4.1 Swap definition | 33 |
| 4.2 Forward swap rate and swap value | 34 |
| 4.3 Spot-starting swaps | 35 |
| 4.4 Swaps as difference between bonds | 36 |
| 4.5 Exercises | 37 |

| | | |
|--|---|-----------|
| 5 | Futures contracts | 41 |
| 5.1 | Futures definition | 41 |
| 5.2 | Futures versus forward prices | 42 |
| 5.3 | Futures on libor rates | 43 |
| 5.4 | Exercises | 45 |
| 6 | No-arbitrage principle | 47 |
| 6.1 | Assumption of no-arbitrage | 47 |
| 6.2 | Monotonicity theorem | 48 |
| 6.3 | Arbitrage violations | 49 |
| 6.4 | Exercises | 50 |
| 7 | Options | 53 |
| 7.1 | Option definitions | 53 |
| 7.2 | Put-call parity | 56 |
| 7.3 | Bounds on call prices | 57 |
| 7.4 | Call and put spreads | 58 |
| 7.5 | Butterflies and convexity of option prices | 60 |
| 7.6 | Digital options | 61 |
| 7.7 | Options on forward contracts | 62 |
| 7.8 | Exercises | 64 |
| PART III REPLICATION, RISK-NEUTRALITY AND THE FUNDAMENTAL THEOREM | | |
| 8 | Replication and risk-neutrality on the binomial tree | 71 |
| 8.1 | Hedging and replication in the two-state world | 71 |
| 8.2 | Risk-neutral probabilities | 73 |
| 8.3 | Multiple time steps | 74 |
| 8.4 | General no-arbitrage condition | 76 |
| 8.5 | Exercises | 78 |
| 9 | Martingales, numeraires and the fundamental theorem | 81 |
| 9.1 | Definition of martingales | 81 |
| 9.2 | Numeraires and fundamental theorem | 81 |
| 9.3 | Change of numeraire on binomial tree | 81 |
| 9.4 | Fundamental theorem: a pragmatic example | 81 |
| 9.5 | Fundamental theorem: summary | 81 |
| 9.6 | Exercises | 81 |
| 10 | Continuous-time limit and Black–Scholes formula | 91 |
| 10.1 | Lognormal limit | 91 |
| 10.2 | Risk-neutral limit | 91 |
| 10.3 | Black–Scholes formula | 91 |
| 10.4 | Properties of Black–Scholes formula | 91 |

| | | |
|--|---|------------|
| 10.5 | Delta and vega | 101 |
| 10.6 | Incorporating random interest rates | 105 |
| 10.7 | Exercises | 106 |
| 11 | Option price and probability duality | 111 |
| 11.1 | Digitals and cumulative distribution function | 111 |
| 11.2 | Butterflies and risk-neutral density | 113 |
| 11.3 | Calls as spanning set | 114 |
| 11.4 | Implied volatility | 115 |
| 11.5 | Exercises | 116 |
| PART IV INTEREST RATE OPTIONS | | |
| 12 | Caps, floors and swaptions. | 119 |
| 12.1 | Caplets | 119 |
| 12.2 | Caplet valuation and forward numeraire | 120 |
| 12.3 | Swaptions and swap numeraire | 122 |
| 12.4 | Summary | 124 |
| 12.5 | Exercises | 124 |
| 13 | Cancellable swaps and Bermudan swaptions | 127 |
| 13.1 | European cancellable swaps | 127 |
| 13.2 | Callable bonds | 128 |
| 13.3 | Bermudan swaptions | 130 |
| 13.4 | Bermudan swaption exercise criteria | 132 |
| 13.5 | Bermudan cancellable swaps and callable bonds | 134 |
| 13.6 | Exercises | 136 |
| 14 | Libor-in-arrears and constant maturity swap contracts. | 141 |
| 14.1 | Libor-in-arrears | 141 |
| 14.2 | Libor-in-arrears convexity correction | 142 |
| 14.3 | Classic libor-in-arrears trade | 144 |
| 14.4 | Constant maturity swap contracts | 145 |
| 14.5 | Exercises | 146 |
| 15 | The Brace–Gatarek–Musielka framework. | 149 |
| 15.1 | BGM volatility surface | 149 |
| 15.2 | Option price dependence on BGM volatility surface | 150 |
| 15.3 | Exercises | 153 |

PART V TOWARDS CONTINUOUS TIME

| | | |
|-----------|---|------------|
| 16 | Rough guide to continuous time | 157 |
| 16.1 | Brownian motion as random walk limit | 157 |
| 16.2 | Stochastic differential equations and geometric Brownian motion | 158 |

| | |
|----------------------------------|-----|
| 16.3 Ito's lemma | 160 |
| 16.4 Black-Scholes equation | 161 |
| 16.5 Ito and change of numeraire | 162 |
| Glossary of notation | 167 |
| References | 171 |
| Index | 173 |
