<i>Preface</i>	page xvii
I Introduction	1
<b>Part I Origins of the state</b>	
2 The reason for collective choice – allocative efficiency	9
2.1 Public goods and prisoners' dilemmas	9
2.2 Coordination games	14
2.3 Public goods and chickens	16
2.4* Voluntary provision of public goods with constant returns to scale	18
2.5* Voluntary provision of public goods with varying supply technologies	22
2.6 Externalities	25
2.7 The Coase theorem	27
2.8 Coase and the core	30
2.9 A generalization of the Coase theorem	32
2.10 Does the Coase theorem hold without predefined property rights?	34
2.11 Externalities with large numbers of individuals	35
2.12 Externalities with large numbers of individuals – a second time	39
2.13 Experimental results in the voluntary provision of public goods	40
3 The reason for collective choice – redistribution	44
3.1 Redistribution as insurance	45
3.2 Redistribution as a public good	47
3.3 Redistribution to satisfy fairness norms	49
3.4 Redistribution to improve allocative efficiency	51
3.5 Redistribution as taking	53
3.6 Income transfers in the United States	56
3.7 Redistribution and the distribution of income	58
3.8 Redistribution to special interests	61
<b>Part II Public choice in a direct democracy</b>	
4 The choice of voting rule	67
4.1 The unanimity rule	67
4.2 Criticisms of the unanimity rule	72
4.3 The optimal majority	74
4.4 A simple majority as the optimal majority	76

5	Majority rule – positive properties	79
5.1	Majority rule and redistribution	79
5.2	Cycling	84
5.3*	The median voter theorem – one-dimensional issues	85
5.4	Majority rule and multidimensional issues	87
5.5*	Proof of the median voter theorem – multidimensional case	92
5.6	Majority rule equilibria when preferences are not defined in spatial terms	94
5.7*	Proof of extremal restriction – majority rule theorem	95
5.8	Restrictions on preferences, on the nature and number of issues, and on the choice of voting rule that can induce equilibria	97
5.8.1	Preference homogeneity	97
5.8.2	Homogeneous preferences and qualified majority rules	99
5.8.3	The relationship between numbers of issues and alternatives and the required majority	103
5.9	Logrolling	104
5.10*	Logrolling and cycling	108
5.11	Testing for logrolling	109
5.12	Agenda manipulation	112
5.12.1	Agenda control in a spatial environment	112
5.12.2	Agenda control in a divide-the-cake game	113
5.13	Why so much stability?	114
5.13.1	Issues are indeed of one dimension	115
5.13.2	Voting one dimension at a time	116
5.13.3	Logrolling equilibria	118
5.13.4	Empirical evidence of cycling	120
5.13.5	Experimental evidence of cycling	123
6	Majority rule – normative properties	128
6.1	Condorcet's jury theorem	128
6.2	May's theorem on majority rule	133
6.3*	Proof of May's theorem on majority rule	135
6.4	The Rae-Taylor theorem on majority rule	136
6.5	Assumptions underlying the unanimity rule	137
6.6	Assumptions underlying the two rules contrasted	138
6.7	The consequences of applying the rules to the "wrong" issues	140
6.7.1	Deciding improvements in allocative efficiency via majority rule	140
6.7.2	Deciding redistribution by unanimity	143
6.8	Conclusions	144
7	Simple alternatives to majority rule	147
7.1	The alternative voting procedures defined	147
7.2	The procedures compared – Condorcet efficiency	148
7.3	The procedures compared – utilitarian efficiency	151
7.4	The Borda count	152
7.4.1	Axiomatic properties	152
7.4.2	The Borda count and the "tyranny of the majority"	154
7.4.3	The Borda count and strategic manipulation	155
7.5	Approval voting	156
7.6	Implications for electoral reform	157

8	Complicated alternatives to majority rule	159
8.1	The demand-revealing process	160
8.1.1	The mechanics of the process	160
8.1.2	Vernon Smith's auction mechanism	168
8.2	Point voting	169
8.3*	An explication of the Hylland-Zeckhauser point-voting procedure	170
8.4	Voting by veto	174
8.5	A comparison of the procedures	179
9	Exit, voice, and disloyalty	182
9.1	The theory of clubs	183
9.2	Voting-with-the-feet	186
9.3	Global optimality via voting-with-the-feet	189
9.4*	Clubs and the core	194
9.5	Voting-with-the-feet: empirical evidence	199
9.6	Voluntary association, allocational efficiency, and distributional equity	202
9.7	The theory of revolution	204
<b>Part III Public choice in a representative democracy</b>		
10	Federalism	209
10.1	The logic of federalism	209
10.1.1	The assignment problem	209
10.1.2	Federalism with geographic representation	212
10.2	Why the size of government may be "too large" under federalism	213
10.2.1	Logrolling	213
10.2.2	Universalism	215
10.3	Intergovernmental grants under federalism	215
10.3.1	Intergovernmental grants to achieve Pareto optimality	216
10.3.2	The empirical evidence on intergovernmental grants	221
10.4	Why the size of government may be "too large" <i>and</i> "too small" under federalism	223
10.5	The problem of centralization under federalism	227
11	Two-party competition – deterministic voting	230
11.1	Outcomes under two-party democracy	231
11.2	Two-party competition in a constrained policy space	236
11.2.1	The uncovered set	236
11.2.2	The uncovered set with high valence issues	240
11.3	Relaxing the assumptions of the Downsian model	241
11.3.1	Candidates have preferences over policies	241
11.3.2	Candidates can enter and exit the contests	242
11.4	Testing the median voter hypothesis	243
11.5	Are local public expenditures public or private goods?	246
12	Two-party competition – probabilistic voting	249
12.1	Instability with deterministic voting	249
12.2	Equilibria under probabilistic voting	252
12.3	Normative characteristics of the equilibria	253
12.4	Equilibria with interest groups	255
12.5	An application to taxation	257

12.5.1	The logic	257
12.5.2	The evidence	259
12.6	Commentary	260
13	Multiparty systems	264
13.1	Two views of representation	264
13.2	Selecting a representative body of legislators	265
13.3	Proportional representation in practice	266
13.4	Electoral rules	266
13.4.1	The Hare, Droop, Imperiali, d'Hondt, and Sainte-Lagué formulas	267
13.4.2	The single-transferable vote (STV)	269
13.4.3	Limited voting	270
13.4.4	Single-nontransferable-vote systems (SNTV)	271
13.5	Electoral rules and the number of parties	271
13.6	Electoral rules and the degree of proportionality	276
13.7	The goals of parties	278
13.7.1	Coalition theories with a one-dimensional issue space	280
13.7.2	Coalition theories with two- or more-dimensional issue spaces	285
13.7.2.1	The political heart	285
13.7.2.2	The dimension-by-dimension median	286
13.8	Cabinet stability	290
13.8.1	The duration of governments	290
13.8.2	The death of governments	292
13.8.3	Summary	295
13.9	Social stability	295
13.10	Strategic voting	296
13.10.1	Strategic voting under the plurality rule	296
13.10.2	Strategic voting in multiparty systems	297
13.11	Commentary	298
14	The paradox of voting	303
14.1	The rational voter hypothesis	304
14.1.1	Expected utility maximization	304
14.1.2	A taste for voting	306
14.1.3	Voting as a game of cat and mouse	306
14.1.4	The rational voter as minimax-regret strategist	307
14.2	The rational voter hypothesis: the evidence	308
14.3	The expressive voter hypothesis	320
14.4	The ethical voter hypothesis	322
14.5	Ethical preferences as selfish behavior	325
14.6	The selfish voter	326
14.7	Summary and implications	329
15	Rent seeking	333
15.1	The theory of rent seeking	333
15.1.1	The basic rent-seeking model with a fixed number of players	335
15.1.1.1	Diminishing or constant returns, $r \leq 1$	336
15.1.1.2	Increasing returns with $1 < r \leq 2$	336
15.1.1.3	Increasing returns with $r > 2$	337

**Contents**

15.1.2	The impact of free entry	337
15.1.3	Rent seeking with sequential investments	338
15.1.4	Relaxing the assumptions	340
15.1.4.1	Risk-neutrality	340
15.1.4.2	Rent seeking among groups	342
15.1.4.3	Rent seeking when the probability of winning is not defined logistically	342
15.1.4.4	Designing rent-seeking contests	343
15.2	Rent seeking through regulation	347
15.3	Rent seeking and the political process	348
15.4	Rent seeking through tariffs and quotas	348
15.4.1	The economic effects of tariffs, quotas, and voluntary export restraints	350
15.4.2	Endogenous protection models	353
15.4.3	Remaining puzzles	354
15.5	Rent seeking in other governmental activities	355
15.6	How large are the welfare losses from rent seeking?	359
<b>16</b>	<b>Bureaucracy</b>	360
16.1	Uncertainty, information, and power	362
16.2	The budget-maximizing bureaucrat	362
16.2.1	Environment and incentives	363
16.2.2	The model	365
16.3	Extensions of the model	365
16.3.1	Alternative institutional assumptions	368
16.3.2	Bargaining between sponsor and bureau	368
16.4	Alternative behavioral assumptions	368
16.4.1	The slack-maximizing bureaucrat	370
16.4.2	The risk-avoiding bureaucrat	371
16.5	Empirical tests	371
16.5.1	Power of the agenda setter	373
16.5.2	Cost differences between publicly and privately provided services	380
16.6	The government as Leviathan	380
16.6.1	Theory	382
16.6.2	Empirical testing – government expenditures and taxes	384
16.7	Conclusions	386
<b>17</b>	<b>Legislatures and bureaucracies</b>	386
17.1	The Congressional-dominance model	386
17.1.1	Congressional dominance through administrative structure	388
17.1.2	Congressional dominance through administrative procedure	388
17.2	The impact of uncertainty and transaction costs	389
17.2.1	Uncertainty and the locus of responsibility	389
17.2.2	Uncertainty, transaction costs, and commitment	391
17.3	Congress and the president	391
17.3.1	The legislature controls the president	393
17.3.2	Presidential control over the legislature	395
17.3.3	The problem of deadlocks	

17.4	Congress, the president, and the judiciary	399
17.4.1	Adding the judiciary to the model	399
17.4.2	The goals of the judiciary	399
17.5	Legislative decision making in the European Union	401
17.6	Conclusions	405
18	Dictatorship	406
18.1	The origins of dictatorship	407
18.2	The goals of dictators	409
18.2.1	The consumption of the dictator	409
18.2.2	Power	411
18.2.3	Security	411
18.3	The functioning and survival of dictatorships	412
18.3.1	The utility-maximizing dictator	412
18.3.2	Tin pots and totalitarians	413
18.3.3	Selective strategies to survive	414
18.3.4	The dictator's dilemma	416
18.3.5	The limits of totalitarianism	417
18.4	The rise and decline of dictatorships	417
18.5	Dictatorship and economic performance	420
18.5.1	The relative advantages of dictatorship and democracy	420
18.5.2	The relative economic performance of dictatorships and democracies	422
18.5.2.1	A direct test of Wintrobe's model of dictatorship	424
18.6	Conclusions	424
 <b>Part IV Applications and testing</b>		
19	Political competition and macroeconomic performance	429
19.1	Macroeconomic performance and political success	429
19.1.1	Vote and popularity functions	429
19.1.2	Whom do voters hold responsible?	433
19.2	Opportunistic politics	437
19.2.1	With myopic voters	438
19.2.2	With rational voters	439
19.3	Partisan politics	440
19.3.1	Partisan politics with retrospective voters	443
19.3.2	Partisan politics with rational, forward-looking voters	444
19.4	The evidence	446
19.4.1	Do politicians try to manipulate the macroeconomic environment?	446
19.4.2	Are there partisan biases?	447
19.4.3	Which theories fit the data best?	451
19.4.4	Additional evidence for the Alesina/Rosenthal model	455
19.4.5	Discussion	456
19.5	Voter behavior	459
19.5.1	Myopic, retrospective, rational	459
19.5.2	Sociotropic or egotropic	460
19.6	Politics and inflation	461

15.1.2	The impact of free entry	337
15.1.3	Rent seeking with sequential investments	338
15.1.4	Relaxing the assumptions	340
15.1.4.1	Risk-neutrality	340
15.1.4.2	Rent seeking among groups	342
15.1.4.3	Rent seeking when the probability of winning is not defined logistically	342
15.1.4.4	Designing rent-seeking contests	342
15.2	Rent seeking through regulation	343
15.3	Rent seeking and the political process	347
15.4	Rent seeking through tariffs and quotas	348
15.4.1	The economic effects of tariffs, quotas, and voluntary export restraints	348
15.4.2	Endogenous protection models	350
15.4.3	Remaining puzzles	353
15.5	Rent seeking in other governmental activities	354
15.6	How large are the welfare losses from rent seeking?	355
16	<b>Bureaucracy</b>	359
16.1	Uncertainty, information, and power	360
16.2	The budget-maximizing bureaucrat	362
16.2.1	Environment and incentives	362
16.2.2	The model	363
16.3	Extensions of the model	365
16.3.1	Alternative institutional assumptions	365
16.3.2	Bargaining between sponsor and bureau	368
16.4	Alternative behavioral assumptions	368
16.4.1	The slack-maximizing bureaucrat	368
16.4.2	The risk-avoiding bureaucrat	370
16.5	Empirical tests	371
16.5.1	Power of the agenda setter	371
16.5.2	Cost differences between publicly and privately provided services	373
16.6	The government as Leviathan	380
16.6.1	Theory	380
16.6.2	Empirical testing – government expenditures and taxes	382
16.7	Conclusions	384
17	<b>Legislatures and bureaucracies</b>	386
17.1	The Congressional-dominance model	386
17.1.1	Congressional dominance through administrative structure	386
17.1.2	Congressional dominance through administrative procedure	388
17.2	The impact of uncertainty and transaction costs	388
17.2.1	Uncertainty and the locus of responsibility	389
17.2.2	Uncertainty, transaction costs, and commitment	389
17.3	Congress and the president	391
17.3.1	The legislature controls the president	391
17.3.2	Presidential control over the legislature	393
17.3.3	The problem of deadlocks	395

17.4	Congress, the president, and the judiciary	399
17.4.1	Adding the judiciary to the model	399
17.4.2	The goals of the judiciary	399
17.5	Legislative decision making in the European Union	401
17.6	Conclusions	405
18	Dictatorship	406
18.1	The origins of dictatorship	407
18.2	The goals of dictators	409
18.2.1	The consumption of the dictator	409
18.2.2	Power	411
18.2.3	Security	411
18.3	The functioning and survival of dictatorships	412
18.3.1	The utility-maximizing dictator	412
18.3.2	Tin pots and totalitarians	413
18.3.3	Selective strategies to survive	414
18.3.4	The dictator's dilemma	416
18.3.5	The limits of totalitarianism	417
18.4	The rise and decline of dictatorships	417
18.5	Dictatorship and economic performance	420
18.5.1	The relative advantages of dictatorship and democracy	420
18.5.2	The relative economic performance of dictatorships and democracies	422
18.5.2.1	A direct test of Wintrobe's model of dictatorship	424
18.6	Conclusions	424
 <b>Part IV Applications and testing</b>		
19	Political competition and macroeconomic performance	429
19.1	Macroeconomic performance and political success	429
19.1.1	Vote and popularity functions	429
19.1.2	Whom do voters hold responsible?	433
19.2	Opportunistic politics	437
19.2.1	With myopic voters	438
19.2.2	With rational voters	439
19.3	Partisan politics	440
19.3.1	Partisan politics with retrospective voters	443
19.3.2	Partisan politics with rational, forward-looking voters	444
19.4	The evidence	446
19.4.1	Do politicians try to manipulate the macroeconomic environment?	446
19.4.2	Are there partisan biases?	447
19.4.3	Which theories fit the data best?	451
19.4.4	Additional evidence for the Alesina/Rosenthal model	455
19.4.5	Discussion	456
19.5	Voter behavior	459
19.5.1	Myopic, retrospective, rational	459
19.5.2	Sociotropic or egotropic	460
19.6	Politics and inflation	461

21.2.5	Fiscal illusion	527
21.2.6	Tax elasticity	529
21.3	Conclusions	530
22	Government size and economic performance	535
22.1	The welfare losses from taxation	536
22.2	Government size and black market activity	539
22.3	Government size and corruption	544
22.4	Government size and economic productivity	545
22.5	Government size and economic growth	548
22.5.1	Methodological issues	548
22.5.2	The evidence	551
22.6	Government activity and the economic decline of nations	554
22.6.1	The logic	554
22.6.2	Empirical evidence	556
22.7	Conclusions	559
<b>Part V Normative public choice</b>		
23	Social welfare functions	563
23.1	The Bergson-Samuelson social welfare function	563
23.2	Axiomatic social welfare functions	568
23.2.1	Fleming's social welfare function	568
23.2.2	Harsanyi's social welfare function	569
23.2.3	Two criticisms of Harsanyi's social welfare function	571
23.2.3.1	Should individual attitudes toward risk count?	571
23.2.3.2	Can individuals agree on a value for $W$ ?	572
23.2.4	Ng's social welfare function	575
23.2.5	Nash's and other multiplicative social welfare functions	576
23.3	What form of social welfare function is best?	578
24	The impossibility of a social ordering	582
24.1	Logic of the proof	583
24.2	Relaxing the postulates	585
24.2.1	Transitivity	586
24.2.2	Unrestricted domain	589
24.2.3	Independence of irrelevant alternatives	590
24.3	Strategy-proof social welfare functions	592
24.4	Implications for public choice	595
25	A just social contract	597
25.1	The social contract	598
25.2	The two principles of justice	599
25.3	Extensions of the theory to other political stages	602
25.4	Critique of the Rawlsian social contract	603
25.4.1	The social contract	603
25.4.2	The two principles of justice	607
25.4.3	Experimental evidence	609
25.5	Two utilitarian defenses of the maximin principle	609
25.5.1	Maximin as a means to obtain compliance	609
25.5.2	Maximin as a redistribution principle	611
25.6	The social contract as a constitution	612

<b>25</b>	<b>The constitution as a utilitarian contract</b>	615
26.1	The constitutional context	616
26.2	The two-action case	617
26.3	The constitutional contract	619
26.3.1	Optimal collective action with only identity uncertainty	620
26.3.2	Optimal collective action with identity and numbers uncertainty	622
26.3.3	Optimal collective action with identity, numbers, and payoff uncertainty	624
26.4	Symmetric and asymmetric bans and obligations	624
26.5	Continuous actions with interdependent utilities	625
26.6	Decision-making costs	627
26.6.1	Prisoners' dilemmas	628
26.6.2	Direct conflicts	631
26.7	Rights and obligations	631
26.8	Constitutions: contracts or conventions?	634
26.8.1	Constitutions as contracts	634
26.8.2	Constitutions as conventions	636
26.8.3	Discussion	637
26.9	Conclusions regarding two-stage theories of social choice	639
26.10	From the normative, two-stage theory of constitutions to hypothesis testing	640
<b>26</b>	<b>Liberal rights and social choices</b>	643
27.1	The theorem	643
27.2	Resolving the paradox	644
27.2.1	Rights over Pareto	644
27.2.2	Pareto trades of actions	646
27.2.3	Pareto trades of rights	648
27.3	Rights over social states versus rights over actions	650
27.4	Liberal rights and obligations	651
27.5	Constitutional rights and liberal rights	652
<b>Part VI What have we learned?</b>		
<b>28</b>	<b>Has public choice contributed anything to the study of politics?</b>	657
28.1	The failures of rational actor models of politics	658
28.2	The rational choice approach to modeling	659
28.3	The prediction of cycling	662
28.4	The predictions of spatial models	663
28.5	Predicting voting and free-riding	666
28.6	Can public choice contribute to the positive study of political institutions?	668
28.7	Has public choice contributed anything to the normative study of political institutions?	670
28.8	Conclusions	671
<b>29</b>	<b>Allocation, redistribution, and public choice</b>	675
